

1. Project & Database
2. SQL Injection
3. Solution

SQL Injection

SQL Injection is a vulnerability where untrusted user input is interpreted as part of an SQL query, allowing an attacker to change the intended behavior of the query.

1. Authentication Bypass
2. UNION Query - for data theft

Solution

1. Parametrized Query
2. ORM (Object Relational Mapping)
 - JS - Squilizer, Prisma
 - JAVA - Hibernate, JPA
 - Python - SQLAlchemy
