

1. Permission Policy
2. Why we need permission policy?
3. Practical

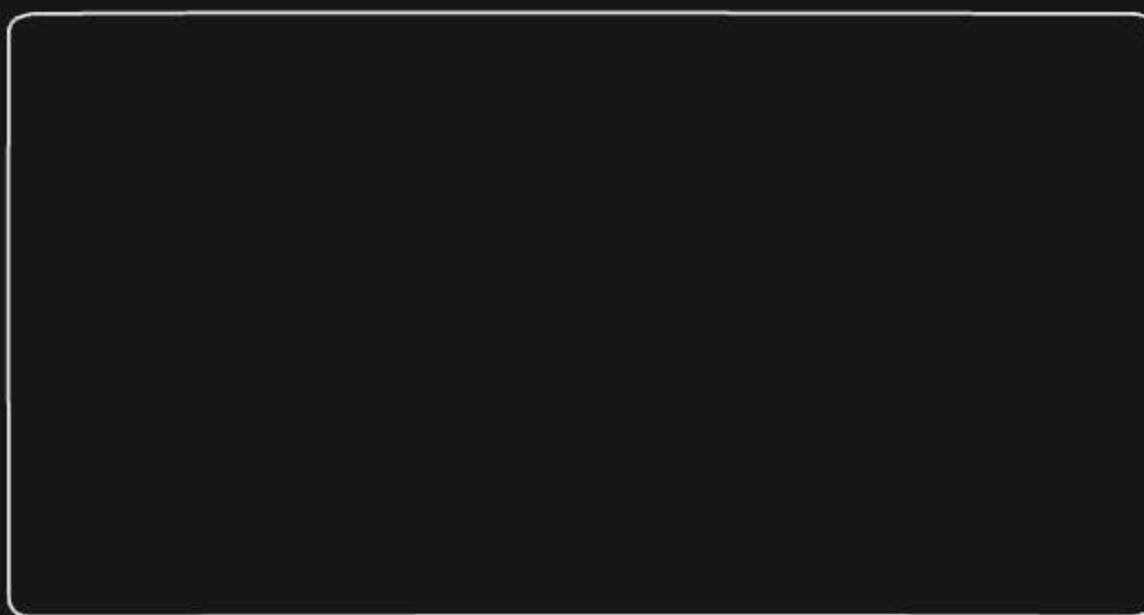

Permission Policy:

Permissions Policy is an HTTP response header that tells the browser which browser features are allowed or denied for the current page and its embedded iframes.

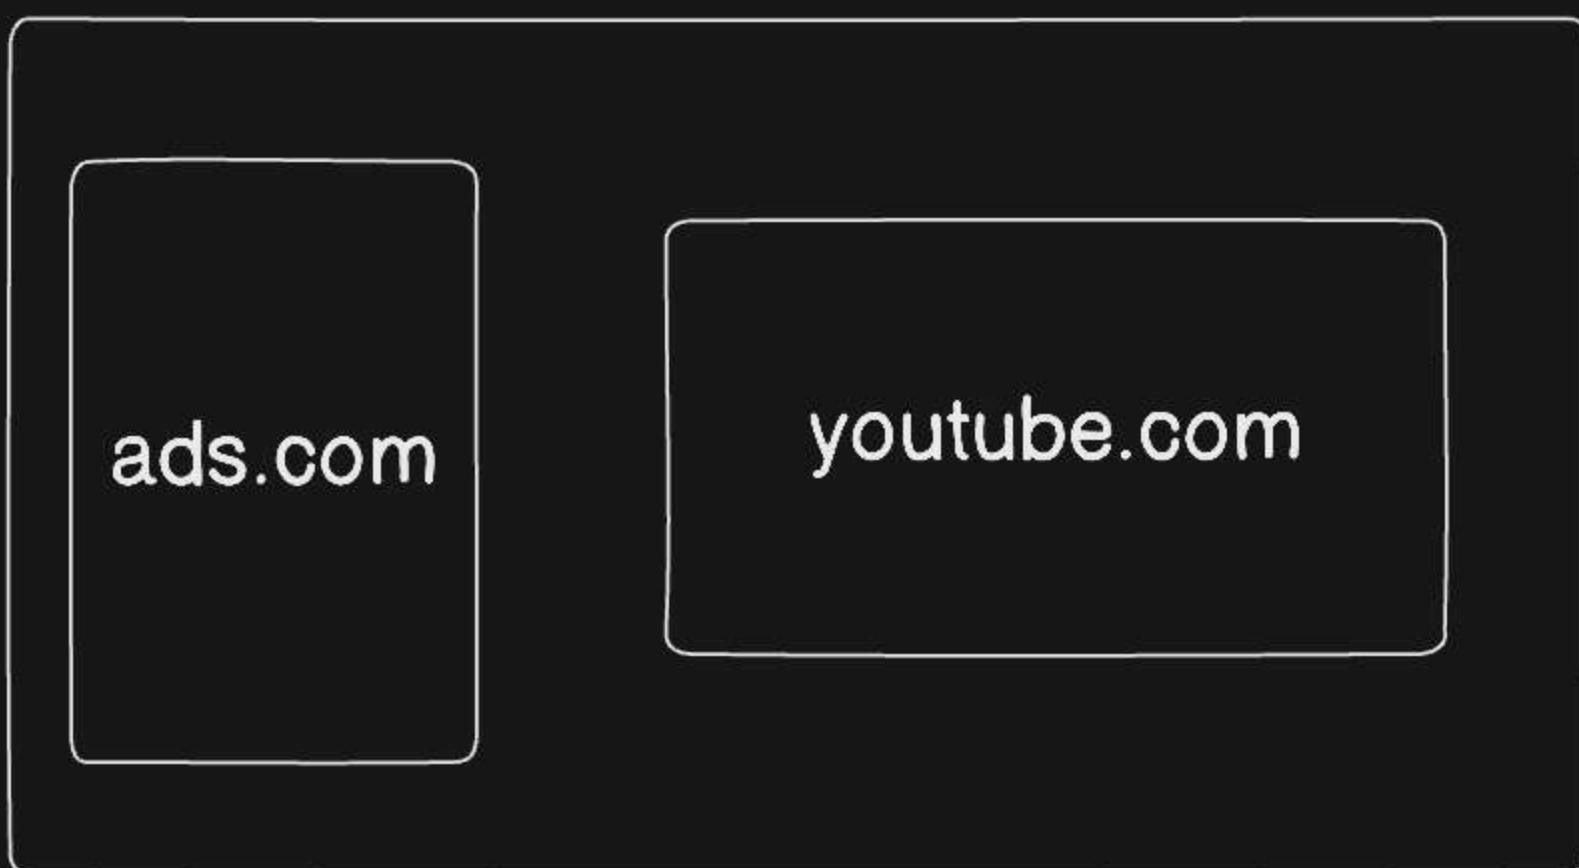

Browser Feature:

1. Camera
2. Audio
3. Geolocation
4. Full Screen etc.

Why we need permission policy?

abc.com

loopkaka.com

Feature Policy - Initially browsers were using this header, this was replaced by Permission Policy.

1. Using Permission Policy header
2. allow
